## The Big List

Main Line Today’s vaccination and screening timeline.

### CHILDREN

**Two months (first-dose vaccinations)**
- Tetanus, Diphtheria, Pertussis (Tdap)
- Polio (IPV)
- Haemophilus influenza (Hib)
- Hepatitis B (Hep B)
- Pneumococcal (PCV)
- Rotavirus (Rota)

**Four months (second-dose vaccinations)**
- Tdap
- IPV
- Hib
- PCV
- Hep B
- Rota

**Six months (third-dose vaccinations)**
- Tdap
- Hib
- PCV
- Rota
- Hep B
- IPV

**Six to 18 months (third-dose vaccinations)**
- IPV

**12-15 months**
- Measles-mumps-rubella (MMR-first dose)
- Hib (fourth dose)
- PCV (fourth dose)
- Varicella zoster virus

**15 months (fourth-dose vaccinations)**
- Tdap

**4-6 years**
- Tdap (fifth dose)
- IPV (fourth dose)
- MMR (second dose)
- Varicella

**11 years and up**
- Tdap (sixth dose)
- Human Papillomavirus (HPV 3 doses)
- Meningococcal (MCV4)

### MEN

**Men 18-39**
- Monthly self-exam of testicles, skin, mouth and breasts to check for abnormalities that may indicate cancer
- Annual blood pressure check
- Annual rectal exam to check for hemorrhoids, colon cancer and prostate cancer
- Complete physical examination every three years
- Blood test and urinalysis every three years to check for various conditions, such as cholesterol, diabetes, kidney dysfunction or thyroid dysfunction
- TB skin test every five years
- Tetanus booster every 10 years

**Men 40-49**
- Monthly self-exam of testicles, skin, mouth and breasts
- Annual blood pressure check
- Annual rectal exam
- Complete physical exam every two years
- Electrocardiogram (EKG) every four years to screen for heart abnormalities
- TB skin test every five years
- Tetanus booster every 10 years

**Men 50 and over**
- Monthly self-exam of testicles, skin, mouth and breasts
- Annual physical exam
- Annual blood pressure check
- Annual fecal occult blood test for signs of colon cancer or polyps
- Annual prostate specific antigen (PSA) blood test to check for enlargement or signs of cancer
- Blood test and urinalysis every two years
- EKG every three years
- TB skin test every five years
- Tetanus booster every 10 years
- Influenza
- Pneumococcal (polysaccharide)

**Women 18-39**
- Monthly self-exam of breasts, skin and mouth to check for abnormalities that may indicate cancer
- Annual blood pressure check
- Annual rectal exam to screen for hemorrhoids, colon cancer and lower rectal problems
- Pap test pelvic exam every one to three years
- Complete physical exam every one to three years
- Blood test and urinalysis every three years to screen for various conditions, such as cholesterol, diabetes, kidney dysfunction or thyroid dysfunction
- TB skin test every five years
- Tetanus booster every 10 years
- Human Papillomavirus (HPV)

**Women 40-49**
- Monthly self-exam of breasts, skin and mouth
- Annual blood pressure check
- Annual rectal exam
- Mammogram every one to two years to screen for breast cancer
- Complete physical exam every two years
- Blood test and urinalysis every two years
- EKG every four years to screen for heart abnormalities
- TB skin test every five years
- Thyroid test every five years
- Tetanus booster every 10 years
- HIV
- Human Papillomavirus (HPV)

**Women 50 and over**
- Monthly self-exam of breasts, skin and mouth
- Annual blood pressure check
- Annual rectal exam
- EKG every three years
- Blood test and urinalysis every two years
- Mammogram every one to two years
- EKG every four years to screen for heart abnormalities
- TB skin test every five years
- Thyroid test every five years
- Tetanus booster every 10 years
- HIV
- Human Papillomavirus (HPV)
- Influenza
- Pneumococcal (polysaccharide)

Entire the life of your mind with a lifestyle at The Quadrangle

The Quadrangle is a continuing care retirement community founded by a group of college professors who believed that purposeful living creates a long and enriching life. At The Quadrangle, we continue to realize their dream by offering our residents extraordinary opportunities for continued learning and exploration. A sense of purpose is common among our residents. We invite you to join us to cultivate yours.

It is obvious to any parent who reads the news or is really connected to their children’s lives, that drug and alcohol abuse and dependence are a major problem among today’s adolescents and young adults. What may not be as obvious is what to do about it if you know or suspect that your child is caught up in it.

Traditional approaches normally involve inpatient rehabilitation programs of varying lengths using strict adherence to a 12-step program. Group or individual outpatient treatments use the 12-step model alone or as a follow up to a 12-step program. Group or individual rehabilitation programs of today’s adolescents and young adults. Dependence are a major problem among that drug and alcohol abuse and

William E. ‘Ted’ Dewart, M.D. Double Board Certified in Addiction Medicine and Internal Medicine; Internationally renowned speaker; Advisor in Chemical Dependency to County Programs, Hospitals, and Schools.

Authors of the upcoming book: “The Self-Medicating Generation: The Experts’ Solution to the Cycle of Addiction”

The new individualized treatment plan often provides outpatient detoxification and medical treatment for withdrawal without an adolescent missing a day of school or work. And, when indicated, medications can be given after detoxification to help reduce the potential for relapse. When combined with a unique weekly intensive psychotherapy program, their initial results show the success rate of total abstinence after one year to be very encouraging, surpassing 75%.

Their positive outcomes are a result of using a whole new category of medications that change the chemistry of the brain coupled with intensive, two-hour long psychotherapy sessions. Here, Dr. Dewart works to restructure the adolescent’s underlying personality by teaching him or her thinking, relating, and behaving in the way of an otherwise successful life.

For more on how Drs. Dewart & Frost’s team approach may be able to help your adolescent or young adult, call 610-825-6607 or visit www.DewartAndFrost.com.
